

# ScandTherm NTC SSP 50N HG0

ITEM #205000J0N000

## Description

Scandtherm NTC is a white, woodfree paper, with black imaging thermosensitive coating.

It is designed for short term use in relatively clean and dry environments, where there are no requirements for surface protection against contaminants or scruffing.

It can be printed with all commonly used technologies for roll converting, including water and uv-based flexo, uv letterpress et.c., if inks and varnishes designed for direct thermal paper is used.

We recommend customers to assess both pre-print and thermal print characteristics under end-use conditions before proceeding to long runs.

This thermal paper has a standard/high sensitivity, making it suitable for print speeds up to 250 mm/s, depending on printer settings.

This product does not contain Bisphenol A.

The values indicated in this leaflet are not intended to be a specification but a guide to the values that may generally be expected. Customers should independently determine, prior to use, the suitability of any material for a specific purpose. All information is subject to change without notice.

### Facestock

Scandtherm NTC is a white, woodfree paper, with black imaging thermosensitive coating designed for short term use in relatively clean and dry environments, where there are no requirements for surface protection against contaminants or scuffing.
